Education

Master STL - Spécialité "Technologies Applicatives"
Université Pierre & Marie Curie - Paris VI

2009

Professional experience

Solutions Architect - BforBank

01/2024

Hybride

As part of the Core Banking Platform migration program

- Defined and prototyped orchestration strategies using Temporal.io
- Analyse technique des API Temenos IRIS et du module Outbox
- Designed target architectures (e.g., VUC, Eckert, Capital Market)
- Delivered a secure partner-facing balance API
- Implemented a high-performance ISO 8583 authorization server

Java, Golang, Spring, Kafka, Kafka Streams, Kafka Connect, Temporal, Keycloak, PostgreSQL, Temenos R24, Argo CD, Kubernetes, GCP

Technical Lead - Figaro Classifieds

03/2019 - 09/2023

Hybride & Full Remote

Modernization through a Cloud Native & Microservices approach on GCP

- Supporting the CTO in making technology choices & architecture patterns
- Spreading best practices into the teams (5 teams, 35 teammates)
- Architecture Blueprints (Golang API, Airflow, Dataflow, CI/CD)
- Work closely with the PMs to refine product roadmaps and prioritize features
- Replatforming in Golang Microservices & Vue.js Frontends

Golang, Scala, Python, Node.js, Vue.js, Redis, PostgreSQL, Elastic, Airflow, Dataflow, PubSub, Cloud Functions, BigQuery, Terraform, Kubernetes, GCP

Big Data Architect - Figaro Classifieds

01/2017 - 03/2019

Hybride & Full Remote

Development of the company wide Big Data platform on GCP (3B events / year)

- Working with Tech Leads to integrate the platform into the overall IT infrastructure
- Selecting appropriate cloud services & designing the overall architecture
- Refactoring Ingestion APIs in Golang using BDD
- Transforming and cleansing historical data
- Automated ETL workflows & replays

Golang, Scala, Python, Redis, PostgreSQL, Elastic, Airflow, Dataflow, PubSub, Cloud Functions, BigQuery, Terraform, Kubernetes, GCP

Technical Lead - Kamet Ventures

Paris & Londres

07/2016 - 12/2016

Coaching the 4 startups of the first wave between Paris & London (21 teammates)

- Conception of a starter kit for the next waves
- Value Propositions, Critical Assumptions, Business Models, Roadmaps
- Technical coaching & pair-programming with the teams
- Immutable infrastructures & Continuous Delivery Pipelines blueprints

Lean Startup, Gamestorming, Scrum, Spring Cloud, Node.JS, React.JS, Angular.JS, React Native, Swift, Ansible, GoCD, AWS

Technical Lead - Sacem

Paris

01/2016 - 07/2016

Development of a Big Data platform, collecting European payments of artists rights from Streaming services (4B events / year)

- Coaching the technical team (6 teammates)
- Conception of a React.js frontend using Material Design Guidelines
- Setting up an Elasticsearch Cluster (10B documents)
- Implementation of an immutable infrastructure on OVH / OpenStack

Scrum, React.JS, Redux, Webpack, Spark, Kafka, Elasticsearch, Cassandra, Node.JS, WS02, OpenStack, Ansible, GoCD, Hubot

Technical Lead - Fortuneo

Paris

08/2015 - 01/2016

Improve quality and time to market using Agile, Craftsmanship and Devops principles

- Implementing a Scrum team with Visual Management (9 teammates)
- Serious Games sessions instead of never-ending meetings
- Continuous Delivery Pipelines to reduce time to market
- Immutable Infrastructure & Code analysis to improve quality

Scrum, Gamestorming, Node.js, AngularJS, AWS, CloudFormation, Ansible, Hubot, JIRA

Senior Software Engineer - Xebia

Paris

04/2013 - 08/2015

Consultant & Active contributor

- Hiring new profiles
- ElasticSearch Trainer
- Organizing tech events
- Conferences Speaker
- Authoring various blog posts and articles

Missions

- Ingenico - Development of MSH platform, reactive data platform based on a microservices architecture
- Unibail-Rodamco - Development of Kuros CRM for the Leasing team
- Voyages-SNCF - Development of Mytripset, the European travel planner

Java, Scala, Node.js, Grails, Spring, Play, Akka, AngularJS, React.JS, Oracle, MongoDB, Kafka, Couchbase, ElasticSearch, Mesos, Marathon, Jenkins, GoCD, Ansible, AWS

Software Engineer - OnePoint

Paris

01/2010 - 04/2013

Missions

- STIME - Development of ALTA, pricing tool for "Les Mousquetaires" supermarkets
- PMU.fr - Development of PMU.fr, the French leader in online horse bets
- Euler Hermes - Development of EOLIS, world leading credit insurance solutions
- Groupama - Development of Gestflow, paperless back office management system

Java, Spring, Hibernate, Node.js, JSF, Backbone.JS, MySQL, Memcached

Software Engineer - SUN Microsystems

01/2008 - 12/2009

Paris & Leuven

Conception of Odt2DAISY, an OpenOffice.org plugin to generate DAISY books

- OpenOffice.org cross-platform addon (Windows, Linux, OSX)
- Voice generation in more than 27 languages (espeak, SAPI5, VoiceOver)
- odt2daisy library integration into DAISY Pipeline
- International conferences & publications (ICCHP, AAATE, CSUN, DAISY, OOCon)

Java, XSLT, DOM, UNO, ODF, DAISY, JUnit/XMLUnit, Ant, Bash, iMovie, Windows, OSX, Linux

G.O Bartender - Club Med

07/2006 - 09/2008

Club Med World Paris

Making between 300 to 600 cocktails per night

Software Developer - Crédit Agricole

06/2005 - 09/2005

Paris

Development of various network & sysadmin tools

PHP, MySQL, HTML, CSS, Sybase, Vim, Solaris
